

PEDRO HENRIQUE ENCARNÇÃO SALLES

Software Developer

encarnacaosalles@gmail.com | github.com/pedroSalles08 | +55 55 99921-4159

EDUCATION

Technical Program in Information Technology Integrated with High School

2024 – Present

Instituto Federal de Educação, Ciência e Tecnologia Farroupilha, Campus Júlio de Castilhos | Júlio de Castilhos, RS, Brazil | 3rd year

- Integrated technical education covering software development, programming logic, databases, computer networks, and other computing fields.

INDEPENDENT SOFTWARE DEVELOPMENT EXPERIENCE

Software Developer | OrbitalAuto

Feb 2026 – Present

Independent Project

| orbitalauto.onrender.com

- Developed a web application that automates weekly meal scheduling in IFFar's Orbital system for multiple users.
- Implemented persistent configuration and recovery for incomplete runs, together with security and administration features that protect user data and monitor automation activity.

Software Developer | InfoSIGAA

Aug 2026 – Present

Independent Project | Open Source

| [Website](#) | [GitHub](#)

- Created a Chrome extension that turns SIGAA grades, averages, absences, and attendance into a clearer and more accessible dashboard.
- Integrated with SIGAA pages to collect and organize academic data without modifying the original system, with privacy-aware storage for personal devices, shared computers, and incognito sessions.

Full Stack Developer | Quelin Joias

Jul 2026 – Aug 2026

Independent Project

| quelin-joias.pages.dev

- Developed a mobile-first digital catalog with search, filters, product pages, contextual WhatsApp contact, and an admin dashboard for catalog and media management.
- Structured the database, administrative authentication, media storage, and application deployment on Cloudflare.

PROJECTS

Music Downloader | Python, PySide6, yt-dlp

- Built a Windows application that converts music lists and Spotify-exported files into an organized MP3 download queue with result review and progress tracking.

Sabor dos Anjos | React, PWA, IndexedDB

- Developed a local-first web application for managing ingredients, recipes, production, sales, customers, and inventory for a small bakery.

SKILLS

Frontend: TypeScript, React, Next.js, Tailwind CSS, JavaScript

Backend: Python, FastAPI, SQLite, Cloudflare Pages Functions

Tools: Git, Docker, GitHub Actions

CERTIFICATIONS AND ADDITIONAL TRAINING

HTML5 and CSS3: Module 1 of 5

Feb 20, 2025 | 40 hours

Curso em Vídeo - Gustavo Guanabara

Algorithms and Programming Logic - The Complete Course

Feb 2, 2025 | 30.5 hours

Udemy - Nelio Alves

Computer Networking Fundamentals

Mar 2025 – Dec 2025 | 40 hours

Cisco Networking Academy (NetAcad) | Instituto Federal Farroupilha
